I. Purpose

This Expert Declaration and Report identifies one gross error of fact regarding the Defendant's theory that mass murders are novel or new to the modern era of the 20th century in large part due to the evolution of firearms technology such as large capacity magazines. As discussed in this report this theory is not supported by my own research. I have been retained to

provide my opinion by the Plaintiffs in *Oregon Firearms Federation, Inc. et al v. Brown et al*, Case No. 22-CV-01815-IM and *Eyre et al v. Rosenblum et al*, Case No. 22-cv-01862-IM. I charge \$75.00 per hour for professional services.

Even without Large Capacity Magazines (LCMs), mass murder was common and often individual in nature.

II. My Current Research Project

A. Defining Mass Murder

Since 2019, I have been researching the history of mass murder in the United States. The definition of mass murder does not have a universal definition. The FBI's definition of mass murder is four or more dead (including the killer) in one event, in one location.¹ Other agencies, such as the U.S. Secret Service use the term "mass attacks" in which "three or more people are harmed."²

For purposes of my research, I have adapted the Secret Service's definition. For purposes of this research, I slightly extended the FBI definition to include at least two murder victims committed in multiple locations within 24 hours and use the Secret Service's "three or more people harmed." The suicide or lawful killing of the mass murderer or murderers is not included in the total dead.

¹ FBI, Serial Murder: Multidisciplinary Perspectives for Investigators 8 (2008), distinguishing mass murder from serial murderers. "Generally, mass murder was described as a number of murders (four or more) occurring during the same incident, with no distinctive time period between the murders."

² U.S. Secret Service, Mass Attacks in Public Spaces – 2019, 6 (August, 2020).

A more widely used definition of mass murder is four or more killed, making comparison with FBI and Secret Service data a bit more difficult. Throughout this Declaration, I will provide information using both definitions.

I have excluded multiday mass murders committed in riots, such as the New York City Draft Riots of 1863, and many of the race riots of the 20th century because they were not in one location. Determining when these murders took place precludes easy classification. I also have excluded crimes such as the Colorado cannibalism murders in 1874, because it is unclear over what period the victims were murdered.

There are deaths that might qualify as mass murder, but which have circumstances that might also qualify as lawful self-defense and are thus not included.³ There are mass murders which appear to be gang-related; I have excluded many of those because determining if they were defensive in nature or not requires confidence in the integrity of the participants, who often have reason to lie.

Obviously, mass murder does not include acts of war. Mass murders committed by governments as official policy are outside the legal definition of murder. Other horrifying mass killings outside our definition include those performed by non-state actors with the acquiescence, assistance, or encouragement of local, regional, or national governments. Some mass murders were not official acts but were assisted by governmental disarming of the victims. Example: the East St. Louis race riot of 1916, where police and state militia disarmed blacks in advance of a non-governmental mass murder.

³ Renewal of Mob Attacks Resulting in 3 Deaths and 13 Injured on Second Day of Lawlessness Causes Governor to Act, Great Falls [Mont.] Daily Tribune, Aug. 7, 1920, at 1.

East St. Louis, Ill. (1916)

7/7/1916: "Cowardly Police and Militia Search Negroe's [sic] Homes, Disarm Them, and

Then Turn Them Over to the Blood-Thirsty Demons Clamoring For Their Lives. Without Arms

or Protection 38 are Killed, More Than 200 Wounded and 325 Negro Homes are Burned and

Looted." 4 "'I killed seventeen last night," he said, grinning as he shifted an ax he was carrying

from one hand to the other. "And I am going to get a few more if I get a chance." 5

Category: public.

Suicide: No

Cause: Racism

Weapon: at least 17 by ax.6

Also excluded are governmentally supported acts of mass murder committed outside the

rules of land warfare. The bombing of the Soo Locks on the Great Lakes shortly after U.S. entry

into World War I, which would otherwise meet the criteria of mass murder, smells suspiciously

like German sabotage and I therefore excluded it. This also excludes one of the earliest American

mass murders: ten murdered by Lenape Indians at a school in 1764 Greencastle, Pennsylvania, 8 as

well as the many thousands (at least) killed in various Indian wars (such as the hundreds killed

during the Dakota War of 1862).

I have excluded most mass murders of Indians by Indians because most were outside the

9

civil society of America, and the records of such crimes are thus necessarily incomplete. The

⁸ Robert J. Ursano, Carol S. Fullerton, Lars Weisaeth, Beverley Raphael, ed., TEXTBOOK OF DISASTER

PSYCHIATRY 204 (2nd ed. 2017).

Criminal Justice Research Center's data on Colonial and Revolutionary New England murders contains examples of Indian mass murders for which we have data and I have included these. ⁹ I have included incidents here where a mass murder (by white or Indian and regardless of the victim's race) was clearly *not* a part of warfare, such as those motivated by robbery or kidnapping with the goal of ransom.

There are mass murders where the victim count includes people killed because a felony was taking place. Because of the felony-murder rule, I have included people killed lawfully in the course of a felony as mass murder victims, such as happened in the Johnson County War.¹⁰ I have excluded incidents in which all the dead were felons.¹¹

There are incidents which might be best categorized as mutual combat, where armed groups attacked each other with great loss of life but determining who were the victims and who were the murderers is not easy from surviving news coverage, such as the struggle between Democratic and Republican campaign workers in Clayhole Voting Precinct in 1922. The ensuing gunfight killed at least five people and wounded ten to thirteen others.¹²

I have excluded a small number of cases where trial found the killer not guilty of what were clearly mass murders. Example: Miss Verna Ware opened fire in the Gatesville courthouse in 1909, killing the man she accused of seducing her, two others not involved in the case and wounding a fourth.¹³

B. Finding Mass Murders

How do you find historical mass murders? The phrase "mass murder" is quite rare in historical documents. Using the *ngram* tool in books.google.com for books published 1600-2000 shows essentially zero matches until 1952,¹⁴ and many of the rare pre-1952 matches are actually abbreviations of Massachusetts such as "Mass. Murder" or "Mass., murder." The abbreviation "Mass." causes similar problems when searching the Library of Congress' collection of 1789-1963 newspapers for the words "mass" and "murder" within five words of each other. An additional problem is the use of the phrase to describe governmentally sanctioned and indeed government-operated warfare. 17

Searching the Library of Congress' *Chronicling America* collection of newspapers for the words "murders", "murdered", "killed", "slain", "dead" in association with numbers found a sea of matches, most of which needed to be read before discarding. In many cases, similar or identical news stories appeared in multiple newspapers. If the same facts appeared repeatedly, and there were hundreds of references to an event, I did not read every newspaper account of that event.

There are several frustrating limitations of the *Chronicling America* collection:

1. Copyright restrictions make post-1922 newspaper collections incomplete.

https://books.google.com/ngrams/graph?content=%27mass+murder%27&year_start=1600&year_end=2000&corpus =17&smoothing=3&share=&direct_url=t1%3B%2C%27%20mass%20murder%20%27%3B%2Cc0, last accessed June 12, 2018.

advanced; Examples: 'Joe is a Good Boy,' Declares Ettor's Parents, [Chicago, Ill.] The Day Book, Oct. 25, 1912;
14; Queries Pour in on J. Frank Hickey, [Chicago, Ill.] The Day Book, Dec. 4, 1912, 28; Written Authority to Walk in Your Own Town, [Chicago, Ill.] The Day Book, Feb. 5, 1912.

¹⁷ Jos. Veltman, Do Workers Want War? [letter to the editor] [Chicago, Ill.] THE DAY BOOK, Jan. 17, 1916, 23.

- 2. Many of these mass murders, in addition to appearing in many different newspapers, sometimes appear in only one or two newspapers, far removed from the crime, both geographically and temporally. One example is a mass murder of three in Tamworth, N.H. in 1857 which appeared only in an 1858 summary of the previous year's events, which was published in Pennsylvania. This made it difficult to gather additional data on the crime.
- 3. Nineteenth century accounts often used the word "murders" rather far afield from its legal meaning, or in reference to general social problems such as alcohol. This produced so many thousands of matches that I have often settled for detailed examination of the first 100 front page news stories. Newspapers in the nineteenth century also published many foreign news accounts and fiction. Limiting searches to the front pages thus reduced false positives which would have to be laboriously examined for location and fiction status. (If it didn't make the front page, it seems unlikely it could be either a specific crime, or something as shocking as a mass murder.)

Defining a mass murder by the number of dead can understate mass murders, if either police or civilian intervention interrupts the murderer. (There are some examples in my list of mass murders cut short, although not short enough, by such actions.) In addition, some of the events gathered here list crimes in which the immediate coverage includes persons wounded so seriously that the coverage describes them as "probably fatally." ¹⁹ When considering the nature of medical and surgical care available until my lifetime, it seems a good guess that those described as "probably fatally" wounded can be properly included among the dead.

One limitation of my research project is that, as my father used to tell me, "Newspapers are the first draft of history." They may miss mass murders because of location, loss of newspapers from the historical record, and sometimes intentional editorial refusal to cover barbarous behavior (which has been demonstrated to promote copycat mass murders, even to the choice of manufacturer of the weapon used).²⁰

¹⁸ Principal Events of General and Local Interest During the Year 1857, Lewiston [Penn.] Gazette, Jan. 21, 1858, 1.

¹⁹ Maniacal Unknown in Attempt to Exterminate Whole Family, BISBEE [ARIZ.] DAILY REVIEW, Apr. 6, 1922, 1.

²⁰ Clayton E. Cramer, *Ethical Problems of Mass Murder Coverage in the Mass Media*, 9:1 JOURNAL OF MASS MEDIA ETHICS 26-42 (Winter, 1993-94).

There is a well-established pattern of copycat crimes inspired by news coverage. One example: An 1887 murder (although with only two victims and thus not in the database) was unmistakably a copycat of a recently reported mass murder. A mechanic read an article about a mass murder committed in part with Rough on Rats, a poison, ²¹ to his wife:

His wife listened to the account of the... murder and then bade her husband read it. He went over it a third time and then she took the paper to the neighbors and had it read twice more. Thursday she sent her mother for yeast, and took a heavy dose of Rough on Rats and forced a dose of the poison down the throat of her babe.... The woman died in great agony and her babe expired soon after.²²

Along with *Chronicling America*, I have made extensive use of the commercial site *Newspapers.com* and a few secondary sources.

Another valuable source was the list of "Homicide among Adults in Colonial and Revolutionary New England, 1630-1797," compiled by Randolph Roth and Cornelia Hughes Dayton.²³ While this is a list of *all* murders, not just mass murders, it provided an additional source of incidents.

C. Group Activity

The State's claim is that earlier mass murders were "typically... a group activity, because technological limitations impaired the ability of a single person to commit mass murder." The supposed distinction between modern individual mass murder and group mass murder of earlier centuries does not stand careful examination. Mass murder is *still* sometimes a group activity.

²¹ "A Maniac Mother," St. Paul Daily Globe, Apr. 24, 1886, 1.

²² "Rough on Rats," Austin Weekly Statesman, Feb. 3, 1887, 7.

²³ Randolph Roth and Cornelia Hughes Dayton, comp., *Homicide among Adults in Colonial and Revolutionary New England, 1630-1797*, Oct. 2009, https://cjrc.osu.edu/research/interdisciplinary/hvd/united-states/colonial-revolutionary-new-england, last accessed June 12, 2018.

Such happened at Littleton, Colo. on Apr. 20, 1999²⁴ and the terrorist attacks of September 11, 2001. Other recent group mass murders include one on Oct. 31, 2019, in Orinda, Cal. A conflict between gangs led to a shooting in which the murderers shot to death five people and "several others were injured."²⁵ On Dec. 31, 1986, in San Juan, P.R. three Teamsters attempted to negotiate a better labor contract with their employer by setting a fire that murdered 97 people.²⁶

As this declaration later shows, individual mass murder is neither particularly modern not dependent on technological advances.

D. Data Limitations

It would be very useful to be able to extract data identifying which were group mass murders and which were individual. When I started this project, this seemed an unnecessary detail and so I did not gather it. While I cannot provide that level of detail on group vs. individual mass murders, I can say with confidence that the mass murders in my collection are primarily individual, although there are a number that are group. How can I be so sure? Family mass murders are very common both historically and in the present. They are usually by either the father or mother.

Before 1960, the intra-family mass murders are 759 of 1,836 incidents; 2,801 out of 8,378 dead. (For 4 or more dead: 291 incidents, dead 1,416).

²⁴ R. Barri Flowers and H. Loraine Flowers, Murders in the United States: Crimes, Killers and Victims of the Twentieth Century 59 (2001).

²⁵ Annie Sciacca, "It was a bloodbath": Orinda Halloween shooting investigation reveals gang connections, SAN JOSE MERCURY-NEWS, Nov. 17, 2019.

²⁶ 3 Teamsters Charged in San Juan Hotel Fire, CHICAGO TRIBUNE, Feb. 4, 1988, https://www.chicagotribune.com/news/ct-xpm-1988-02-04-8803270617-story.html, last accessed November 24, 2018.

When gathering this data, I only recorded if a particular weapon was used rather than counting deaths by weapon. In older news accounts, there is no breakdown of deaths by weapon. In many cases, the state of forensic medicine would make it impossible to determine if the ax to the head or the subsequent knife to the throat was the fatal injury. It would make little difference which caused a victim's death: the murderer's punishment would be the same.

A few examples of mass murders when firearms technology was completely irrelevant:

Clarksburg, Va.: Nov. 10, 1805: Man murdered his wife and eight children. While found guilty, there was substantial evidence of mental illness. Weapon: ax.²⁷

Hallowell, Me.: Jul. 9, 1806, The father murdered his wife and seven of his eight children with an axe or knife before killing himself with a knife. The cause was unclear, but the murderer mentioned poverty in a suicide note. Weapon: ax.²⁸

Uniontown, Wash. Feb. 25, 1901: A woman threw her six children down a 30 foot deep well, "then jumped into the well, and, the belief is, held their heads under water until all were drowned." "She is violently insane. The woman's husband died a year ago, and she has been supported by the county and charity of neighbors." Reporter interview supports evidence of insanity: "[S]he gave him incoherent reasons for slaying her little ones.... [s]he had read of the Chinese war and the terrible atrocities committed in the Orient, and had warning that the Chinese were coming today to burn her house and slay her children... Mr. Rustemeyer... was well

²⁷ Trial of Abel Clements, [Edinburgh, Scotland] CALEDONIAN MERCURY, Aug. 25, 1806, 4.

²⁸ Laurel Thatcher Ulrich, A Midwife's Tale: The Life of Martha Ballard, Based on Her Diary, 1785-1812 291-307 (1990),; Horrid Murder! At An Early Hour On Wednesday Morning Last, The Inhabitants Of This Town Were Alarmed With The Dreadful Information... 1 (1806).

²⁹ Drowned Her Six Children, ADAMS COUNTY NEWS [Ritzville, Wash.] Feb. 27, 1901, 4.

³⁰ Washington Standard [Olympia, Wash.], Mar. 1, 1901, 3.

acquainted with the family... He said... Mrs. Wurzer was never considered just right in her mind,

and thinks she should have been restrained of her liberty long ago." Weapon: drowning.³¹

Belvidere, N.J. (1843)

Two (perhaps three) men murdered John Castner, his wife, one of their children, "and an

old bachelor brother-in-law." The purpose was believed to be either robbery or inheritance of the

land by one of the murderers. Weapon: blunt object³²

Before 1960, there were 807 non-firearm mass murders: 3,812 dead: an average of 4.72

dead per incident; 866 exclusively firearms mass murders, 3,740 dead: an average of 4.31 dead

per incident. (For four or more dead: 393 non-firearm incidents, 2,590 dead, an average of 5.59

dead per incident. Firearms incidents: 313 with 2,110 dead; 5.74 average.) Firearms mass murders

were not rare, even with "primitive" technology:

Swan River, Minn. Terr. (1860)

Early 1860 or late 1859: A very complex incident. One Chippewa warrior ("A") murdered

another Chippewa ("B"). A few days later, B's squaw ("C") saw A, and shot him. A's brother

("D") shot C. C's brother ("E") shot D.

Category: public

Suicide: no

Cause: revenge

Weapon: firearm³³

³² "The Warren Tragedy," American Republican and Baltimore Daily Clipper, Jan. 23, 1845. 1.

16

³³ Indian revenge, Muscatine [Iowa] Weekly Journal, Jan. 27, 1860, 1.

Coldwater, Mich. (1865)

Jan. 30, 1865: Young man becomes engaged to a woman in Lorain Co., Ohio. This is a

problem, because his wife in Coldwater, Mich., is about to give birth, so he returns home, where

his wife lives with the young man's parents. In the midst of giving birth, the young man murdered

his wife. When the young man's father and mother showed up, he shot them to death. (Other

accounts identify the town as Woodstock, and that the murder of his wife and unborn child

followed the murder of his parents.) His behavior after arrest, as newspaper coverage described,

"suggests the charitable conjecture that the man is insane." He confessed the crime and signed

autographs for the crowd around the jail that described himself as "murderer of his wife, father

and mother." He invited his friends in Lorain County to visit him in jail "where they would find

him 'playing checkers with his nose, on the jail windows."

Category: family

Suicide: no

Cause: mental illness

Weapon: firearm³⁴

Sleepy Hollow, N.Y. (1870)

Jan. 1. 1870: Farmer murdered his wife, and two of his neighbors, father and son, who

appear to have visited the murderer's wife in his absence. The murderer had a reputation for being

too fond of rum.

Category: public

³⁴ A Triple Murder, [Plymouth, Ind.] MARSHALL COUNTY REPUBLICAN, Feb. 16, 1865, 1.

17

Suicide: no

Cause: jealousy?

Weapon: firearm³⁵

Glenville, Minn. (1889)

Feb. 15, 1889: Murderer, relative of the victims, shot to death, "Mary Chemeieck, aged six,

and her sister Rose, aged eleven..." Apparently, his niece, Rose, had spurned his advances. He

then murdered their mother with a shotgun and committed suicide.

Suicide: yes

Cause: unknown

Weapon: pistol, shotgun³⁶

A mass murder that is *not* part of the database shows how "primitive" firearms technology

is not a barrier to school mass murder. A former teacher showed up at a Bremen, Germany,

Catholic school "armed with six loaded revolvers." He killed one teacher, two children, "three

children were gravely injured and three other children were slightly wounded." The article

described him as "demented."³⁷ Depending on whether they were they were 5-shot, 6-shot, or 9-

shot revolvers (all still common today) he could have fired 30, 36, or 54 shots without reloading.

Of course, reloading a revolver with speedloaders can be done by a skilled shooter in a

second or two at most. Jerry Miculek has demonstrated his ability to accurately fire 16 rounds in

³⁵ A Triple Murder at Sleepy Hollow, WILMINGTON [N.C.] JOURNAL, Jan. 14, 1870, 1.

³⁶ He was a Rejected Lover, St. Paul Globe, Feb. 17, 1889, 1.

³⁷ Maniac Shot Many People, Barre [Vt.] Daily Times, Jun. 20, 1913, 1.

18

four seconds from an eight-round revolver using a speedloader.³⁸ A mass murderer carrying four speedloaders could accurately fire forty rounds in eight seconds. This is slower than a mass murderer with a semiauto rifle and a 30-round magazine, but not by much.

Firearms become more common weapons by the 1920s. Axes and hatchets declined as wood stoves became less common. While I have not categorized the poison mass murders as precisely as I might do if I were starting from scratch, "illuminating gas" and "Rough on Rats" (both commonly used to wipe out your spouse and children) declined as automobile exhaust poisoning rose.

This should be no surprise; mass murderers use what is available. This May 20, 1931, Mattoon, Ill. incident catches this improvisational nature well. A former employee of her late husband attempted to burn to death the woman and her two daughters with whom he had recently moved to Illinois. They escaped the burning house. He then shot to death the mother, attempted to strangle the daughters, then shot them and beat them to death with an automobile starter crank. Weapons: firearm, strangle, blunt.³⁹ Similarly, May 30, 1840: The husband, murdered his mother-in-law and her five children. Cause: robbery. Weapon: strangulation; stone; axe, rifle; knife. He confessed after the first hanging failed.⁴⁰

Even today's gun mass murderers are not as narrowly focused as the popular imagination sees them. May 24, 2014, Isla Vista, Cal.: College student, upset about his sex life (or rather its absence) stabbed to death his three roommates, shot three women at a sorority (two of whom died),

³⁸ "Revolver Speed Reload! 16 rounds in four seconds on slo mo! S&W 929 Jerry Miculek," https://www.youtube.com/watch?v=0FbUMqoyjDw&t=7s, last accessed January 17, 2023.

shot another student, injured two bicyclists by ramming them with his car, and shot and wounded four pedestrians.⁴¹

For the following table, some of these weapon types require explanation.

UNKNOWN means the weapon type was not identified in the article.

AIRCRAFT is for murders committed with an airplane (not all of which took place on Sep. 11, 2001). (Bombing of planes is in the EXPLOSIVE weapon type.)

TRAIN involves intentional derailment of trains to cause loss of life. The motivation for most of these crimes in uncertain. One was insurance fraud; authorities alleged "that the men entered into the plot to get rid of their wives and at the same time to collect damages from the railroad company." One of the murderers collected \$500 from the railroad for injuries to his wife. ⁴² Another, on Dec. 27, 1934: Police charged three men with the intentional derailment of a train, in the hopes that one of the train crew would lose his job, so that one of the three would get that job. The crash killed three employees and injured 16 passengers. ⁴³

Incident count by weapon type for mass murders before 1960 where only one weapon type was used:

III. Killing People Without Modern Firearms Technology

How do you kill lots of people without modern firearms technology? Before 1960, there are four incidents with more than 50 dead. Colfax, Louisiana (1873) where the KKK murdered 150 black civil rights activists using firearms; Mountain Meadows, Utah (1857) where Mormons with firearms of type unknown murdered 140 settlers moving west; Tulsa, Okla. (1921), at least 89 murdered by a mob, with a variety of weapons, Calumet, Mich. (1913) where one person provoked a panic that killed 74 people, mostly trampled to death.

By comparison, my database, while incomplete after 1960, has six mass murders with more than 50 dead after 1960: San Juan, P.R. (1986), 97, dead by arson committed by three men; New York City (1990), 87 dead by arson by one person; Oklahoma City (1995), 168, dead by explosive committed by two (only one was given a capital sentence); New York City (2001), 3047, dead by

aircraft, and Arlington, Va. (2001), 184, dead by aircraft with 19 murderers from both events; Las

Vegas (2017), 58, dead by one rifleman.

A. Explosives

One popular method was explosives.

Sells, Ark. (1900)

Oct. 15, 1900: "[F]ather, mother, and four young children blown to atoms" by dynamite

explosion. "It is believed that a dispute over a homestead claim prompted the outrage."

Category: family non-resident

30

Tulsa, Okla. (1921)

05/01/1921: The police arrested a young black man for what later appears to have been an

accidental touching of a white female elevator operator. Rumors spread that police charged him

with sexual assault. A lynch mob arrived at the county jail. The sheriff and deputies prevented

seizure of the young man. A group of armed black men offered to help the sheriff defend the jail.

This display of arms by black men inflamed white public sentiment leading to the destruction of

Greenwood, the black section of Tulsa. More than one thousand homes were burned and at least

89 dead. Newspapers and public officials removed news accounts and official records about the

riot from files. The Tulsa Race Riot Commission in 2001 "concluded that between 100 and 300

people were killed and more than 8,000 people made homeless over those 18 hours in 1921," with

many bodies buried in unmarked mass graves.

31

rebelled at the authority of teachers, liked to hear the sound of fire sirens and to watch fire engines race along the street."65

After 1960, of course, there have been several arson mass murders with equal or larger death counts, and this remains a common method of mass murder in other nations. In Australia, an arsonist burned the Childers, Queensland's Palace Backpackers Hostel in 2000, killing 15.⁶⁶ The 2011 Quakers Hill Nursing Home fire killed eleven, set by a nurse after police questioned him about drug abuse.⁶⁷ Japan had several arson mass murders in late 2021, killing 24, 17, and 33 in separate incidents.⁶⁸ These required no advanced firearms technology or even firearms. The previously mentioned San Juan, P.R. arson mass murder killed 97.⁶⁹ The March 25, 1990, Happyland Social Club fire killed 87 people, leaving three survivors. Angry at his girlfriend, the murderer used \$1 of gasoline and a match to set fire to her place of employment.⁷⁰

New Orleans, La. (1973)

Jun. 24, 1973: The murderer took revenge for being expelled from the UpStairs Lounge, a gay bar. He walked down the street and bought a bottle of cigarette lighter fluid, killing 33 people.⁷¹

Chicago, Ill. (1976)

01/30/1976: An employee of Wincrest Nursing Home with a mental illness problem

(pyromania) started a fire in a clothing wardrobe, which killed 22 residents. The employee was

charged with arson.⁷²

E. Brutal Misuse of Tools

Villisca, Ia. (1912)

Sep. 9, 1912: It appears that a business competitor and member of the Iowa State Senate

murdered Joseph Moore, his wife Sarah, their four children and two visiting children "with an ax."

An "itinerant minister" was charged. The Iowa Attorney-General "sought to commit" the minister

"to an insane asylum, a step that would bar the prosecution of any other person suspected of the

crime."

Relatives of the victims claimed that the Attorney-General blamed the wrong person; in

response, the Iowa legislature passed a law prohibiting public discussion of the crime. This led to

an "injunction against J.N. Wilkerson, a detective, whose four years' investigation of the murders

cast suspicion on a prominent state senator." The public meeting by Villisca residents took place

in Omaha, Neb., instead.

The following table shows the proximate cause of all mass murders in my database before 1960. (After 1960, the data is not yet complete.) A breakdown of these abbreviations:

- **Rob** is a mass murder performed as part of a robbery or to eliminate witnesses to the robbery.
- MI (Severe mental illness, primarily psychoses and other illnesses that cut off the sufferer from reality) includes all crimes where either contemporary accounts describe the murderer as insane, or where the nature of the crime makes other explanations implausible (this is necessarily a judgment call, on which my experience with mentally ill relatives and friends informs my opinion).

The legal definition of mental illness is much narrower than the medical definition. Through most of U.S. history, the McNaughton Rule (sometimes spelled M'Naughten) defined legal insanity as: "at the time of committing the act, the accused was laboring under such a defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing or, if he did know it, that he did not know what he was doing was wrong." A person who did not know he was doing wrong, was insane.

Persons who are medically mentally ill sometimes know that they are doing wrong and try to escape arrest and conviction (perhaps because the "aliens," or the CIA or KGB "agents" that they have just murdered are still after them). Such persons are legally sane, while in any conventional sense, they are as "mad as hatters."

- MI? are persons whose sanity seems questionable but for which contemporary accounts are less than persuasive.
- **PPD** (Postpartum Depression): Tragically, many mentally ill or possibly mentally ill incidents (not included in the MI or MI? category) are mass murders by mothers with recently born babies. In cases where the murders are by recent mothers and where news accounts provide no other explanation I have categorized these as **postpartum depression**. Some news accounts identified the mother as 'temporarily insane' with no previous history of mental illness. In a few cases the news accounts report on previous mental illness hospitalizations associated with previous births.
- Many cases I have listed as "PPD?" because this is a plausible explanation when no other seems more likely.
- **Resist** is a criminal resisting arrest.
- **Unknown** describes a very large number of crimes where either the motivation is unclear or the newspaper coverage is silent; this also includes some mass murders where the inability to identify the murderer makes cause impossible to determine.
- **Religion** is mass murders committed as part of religious persecution. (And yes, in America!)

⁷⁸ The insanity defense and Diminished Capacity, https://www.law.cornell.edu/background/insane/insanity.html

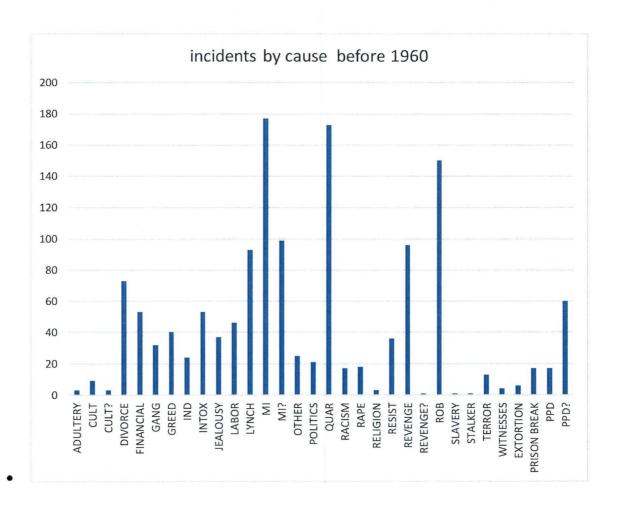

- Racism is its frequent cousin. In some cases, these include revenge or retribution against Indians for crimes not, or at least not clearly committed by the victims.
- **Politics** are murders committed to advance a political cause.
- **Terror** are mass murders committed to cause mass fear for purposes of political change outside elections. Example: 9/11.
- **Revenge** are mass murders committed to take revenge for real or perceived injuries by the murderer, his family, or acquaintances.
- Ind are crimes between Indians and settlers that are not official acts of war, but that might have been seen that way by the murderers. I have classified all attacks against peaceful travelers, settlers, and Indians in this cause. (In some cases, the killers openly admitted that the victims were "peaceful," but were supplying guns to less friendly tribes.) 79
- **Financial** is a strange subclass of family murders committed, usually by a parent concerned their family is about to become impoverished, who then "protect" them from that suffering by mass murder. In some cases, this seems to be a form of mental illness: at least one example involved a mass murderer who was in no danger of impoverishment.
- Labor are crimes committed during labor disputes, sometimes against strikebreakers, sometimes against labor unionists.
- Quarrel are incidents that start out as some relatively minor dispute before escalating into disproportionate response.
- **Cult** refers to mass murders committed by oddball religious cults; I was surprised how widespread these were in the early 20th century (the Church of the Sacrifice slaughtered entire families, often with the family's own ax).
- Rape are mass murders committed to eliminate witnesses to a rape.
- **Greed** are mass murders carried out to obtain wealth other than by robbery, often by inheritance from the deceased.
- **Divorce** is an alternative form of **Revenge**; divorce has been or is in the process and someone is seeking retribution. This includes separated spouses attempting reconciliation.
- Adultery: a variant of Revenge.
- Jealousy: should be obvious.
- **Intoxication** are crimes attributed to alcohol or drug-induced stupidity. The strong overlap between **mental illness** and **substance abuse** (one often causing the other) makes some of these hard to distinguish, especially 150 years after the crime.
- **Bullying** is a recent category, and one that I suspect reflects some deeper mental illness; I was bullied as a child, had access to low-grade explosives (nerds have peculiar hobbies), and never even *thought* of mass murder (or even low-intensity revenge).
- Stalker: someone did not get their attentions rewarded as they saw fit.
- Witnesses: Eliminating witnesses to some crime other than rape or robbery.

Before 1960 at least four dead, excluding UNKNOWN:

It should surprise no one that mental illness and likely mental illness are a high frequency category. While most mentally ill people are primarily a hazard to themselves, severely mentally ill people are overrepresented in murder and other violent crimes.⁸⁰ Deinstitutionalization of the mentally ill starting with New York in 1964 and California in 1969 played significant roles in increased homelessness and violent crime rates.⁸¹

Professor Bernard E. Harcourt points out that the rise in murder rates in the 1960s, and their decline in the 1990s correlated with the change in the percentage of the population that was

⁸⁰ See Clayton E. Cramer, *Mental Illness and the Second Amendment*. 46 Connecticut Law Review 1301-6 (May 2014):(collecting studies).

⁸¹ See Clayton E. Cramer, My Brother Ron: A Personal and Social History of the Deinstitutionalization of the Mentally Ill (2012) and Jean Isaac Rael and Virginia C. Armat, Madness In The Streets: How Psychiatry And The Law Abandoned The Mentally Ill (1990) for how beautiful abstract theories and fanaticism created the tragic urban landscape of modern America.

institutionalized: those who were confined to either a mental hospital or prison. According to Harcourt, sociologists examining the expansion of imprisonment in the 1990s, the so-called "incarceration revolution," missed the even more important component of institutionalization: mental hospitals and then prisons, as mentally ill persons became guests of the state for serious crimes. When adding mental hospital inmates to prisoners, Harcourt found an astonishingly strong negative correlation between the institutionalization rate, and the murder rate: -0.78. Harcourt found that even when adjusting for changes in unemployment and the changing fraction of the population that was at their peak violent crime ages, the negative correlation remained strong, and did a better job of predicting both the 1960s rise and the 1990s decline in murder rates than other models.⁸²

Steven P. Segal of the University of California, Berkeley studied state-to-state variations in murder rates and mental health care, controlling for socioeconomic, demographic, and geographic data. He concluded that "[I]ess access to psychiatric inpatient-beds and more poorly rated mental health systems were associated with increases in the homicide rates of 1.08 and 0.26 per 100,000, respectively." (Since the national average homicide rate was 7.4 per 100,000 people for 2020,83 more access to beds is clearly quite important in reducing homicide rates; "poorly rated mental health systems" matter, but not as dramatically.)

Segal observed an even greater difference from the variation in involuntary civil commitment (ICC) laws. "Broader ICC-criteria were associated with 1.42 less homicides per 100,000" or bit more than one-fourth of the national homicide rate. In short, states where

involuntary commitment of the mentally ill was relatively easy had significantly fewer murders than states where it was very hard.⁸⁴

A 2000 New York Times examination of mass murderers concluded:

The Times' study found that many of the rampage killers... suffered from severe psychosis, were known by people in their circles as being noticeably ill and needing help, and received insufficient or inconsistent treatment from a mental health system that seemed incapable of helping these especially intractable patients.

Only a small percentage of mentally ill people are violent, and many advocates bristle at any link between mental illness and violence out of concern that it will further stigmatize an already mistreated population.

However, the Times investigation of this particular style of violence -- public rampage killings -- turned up an extremely high association between violence and mental illness. Forty-seven of the killers had a history of mental health problems before they killed; 20 had been hospitalized for psychiatric problems; 42 had been seen by mental health professionals. 85

A few representative cases from the period before 1960:

New Haven, Conn. (1930)

Jun. 21, 1930: The father had been involuntarily committed to a mental hospital. He escaped, threw his four children and wife from a 400-foot cliff, then jumped.

Category: family

Suicide: yes

Cause: mental illness

Summary

Mass murder is not particularly new, nor is historical mass murder a peculiarly group activity. Almost everything can be, and has been, used to commit mass murder in America. The mass murder at Cleveland School in 1989 that started California's legislative focus on LCMs involved a mentally ill drifter with a history of involuntary commitment and a spotty record of outpatient treatment. As the California Dept. of Justice's official report observed:

In an ideal world, ample resources would have been available to detect his problems, identify them as potentially dangerous and likely to result in his life being uselessly wasted, and to provide for a type of intervention with a reasonable prospect of making a difference. However, in a world in which government spending has to recognize realistic limits set by the public, such resources will never be plentifully available.⁸⁹

This is an especially painful paragraph for me. My smarter, older brother's spiral down into schizophrenia resulted in brushes with law but never with such a horrible ending. It was still a life wasted by California's confused and irrational mental health policy. Has California's more than 20 years of LCM laws, defenses of those laws, prison sentences for offenders, and dealing with other mass murders (not all with guns) *really* been cheaper than providing mental health care?

The focus of the State on the *method* of mass murder might be better spent on solving the underlying *causes*. This abstract closes with a chilling sentence:

A case of an attempted mass shooting at a large psychiatric hospital in the United States by a 30-year-old male with severe mental illness, somatic delusions, and exceptional access to healthcare professionals is reported. Six persons were shot, one died at the scene, and the shooter was then killed by the police. Data were gathered from court documents and media accounts. An analysis of the shooter's psychiatric history, his interactions with healthcare professionals, and communications prior to the shooting suggest a rare form of mass murder, a

⁸⁹ Nelson Kempsky, *A Report to Attorney-General John K. Van de Kamp on Patrick Edward Purdy and the Cleveland School Killings*, October, 1989, 19, https://schoolshooters.info/sites/default/files/Purdy%20-%20official%20report.pdf, last accessed November 26, 2022.

random attack by a documented psychotic and delusional individual suffering with somatic delusions. Despite his being psychotic, the killer planned the attack and made a direct threat 1 month prior to the shootings. This case highlights problems with the healthcare system, indicating that it might be ill equipped to appropriately deal with severe mental illness.⁹⁰ [emphasis added]

Confronting the extent which a shortage of mental health services and the difficult nature of involuntary mental health commitment in much of America would be a more effective strategy.

A severely mentally ill person without an LCM could follow in the footsteps of previous generations and use less regulated weapons: ax, hatchet, knife, poison, trail derailment.

BACKGROUND AND QUALIFICATIONS

A copy of my *curriculum vitae* is attached to this Declaration as *Exhibit Cramer-1*.

I attended Sonoma State University where I received a Bachelor of Arts and master's degree in history. My Master's Thesis was "Concealed Weapon Laws of the Early Republic".

I was awarded First Place by the Association for Education in Journalism and Mass Communication Ethics Prize for my article "Ethical Problems of Mass Murder Coverage in the Mass Media," *Journal of Mass Media Ethics* 9:1 [Winter, 1993-94] 26-42.

I am currently employed as an Adjunct Professor College of Western Idaho, Nampa, teaching Western Civilization I and U.S. History I.

My publication "Why Footnotes Matter: Checking Arming America's Claims,"

Plagiary 1(11):1-31 (2006) revealed the falsehoods presented in Michael A. Bellesiles's

book "Arming America: The Origins of a National Gun Culture" (New York: Alfred A.

Knopf, Inc., 2000), including significant discrepancies in American history and citations and

⁹⁰ Christine Sarteschi. (2015). Severe Mental Illness, Somatic Delusions, and Attempted Mass Murder. Journal Of Forensic Sciences. 61. 10.1111/1556-4029.12876.

quotes that did not match the historical record. Bellesiles' book contained quotations taken out of context, which completely reversed the author's original intent. Dates were altered and statutory text was changed to completely reverse the meaning of the law. The sheer volume of these errors, and their consistent direction, would seem to preclude honest error. Emory University conducted an investigation that strongly criticized Bellesiles' ethical standards; Bellesiles resigned from his tenured position at Emory. Columbia University initially awarded Bellesiles the Bancroft prize for his book "Arming America", but revoked the award

after my research proved that the book was fraudulent.

My publications include:

- · Lock, Stock, and Barrel: The Origins of America Gun Culture, Praeger Press, 2018;
- · Social Conservatism in An Age of Revolution: Legislating Christian Morality in Revolutionary America, CreateSpace, 2016;
- · Historical Evidence Concerning Climate Change: Archaeological and Historical Evidence That Man Is Not the Cause, CreateSpace, 2016;
